Responsible for producing a distinctive and appealing visual language **Sanindusa's design** element has been present since its genesis. It comprises the whole creative process which expresses the vision of its creators and mirrors the company's positioning. It does not stop in the piece's aesthetic, instead it gathers the visual attributes with the functional ones, making interaction both as beautiful as practical and natural.

The pieces are conceived in a **perfect symbiosis of colours, materials and shapes** which allow a fluid interpretation of the elements and elevates the user experience.

By following their core elements the company has achieved ongoing **brand recognition, awards and return**.

CONTINUITY OF FUTURE GENERATIONS

Sanindusa produces **sustainable products** to benefit the environment and as a way to encourage good practices. With natural resources in mind the brand offers both a range of solutions that eliminates or reduces water consumption as well as presents concepts that include ecological features like **EcoSpot** and **Coldopen**.

Consciously building its products to minimize or reverse environmental impacts is a constant concern and one of the main pillars of **Sanindusa** to ensure the **continuity of future generations**.

TECHNOLOGY COMES TO THE BATHROOM

Some of **Sanindusa's** products that previously performed basic functions are now equipped with smart devices capable of providing unique and comfortable experiences. This technological incorporation came with functionalities that provide **leisure** and **fun** to the time spent in front of the mirror or in the bath.
